

DELIVERY MONITORING

Planning and tracking. KLOUDIP automates goods distribution between vehicles, optimizes routes, and provides drivers with handy navigation.

Temperature and humidity monitoring. The system traces storage and transportation of heat-sensitive goods. The system alerts clients of any deviations to prevent cargo and financial losses.

Door opening detection. Cargo remains safe with KLOUDIP preventing unauthorized access to transported goods.

KLOUDIP

Trusted: 10 years connecting fleets.

Flexible: clients choose additional sensors and apps, thus shaping prices.

Large-scale: 10,000 connected assets for 500 corporate clients.

Developing: providing custom software for every task, business, and niche.

Comprehensive: 300+ monitoring parameters to control and report on.

DRIVER ASSESSMENT

DELIVERY MONITORING

FLEET MANAGEMENT

Real-time monitoring and analytics by KLOUDIP enhance the fleet performance, cargo safety, drivers discipline, and maintenance quality.

Fuel control module allows calculating fuel consumption in vehicles, machinery, generators, and dispensers. You detect any type of fuel misuse and control the whole cycle of fuel distribution from filling stations to vehicles.

Security solutions promote cargo, vehicle, and human safety. In case of emergency, the system detects their precise location and enables real-time tracking to the point of recovery.

DRIVER ASSESSMENT

The solution to control driving style and ensure safer operations for each vehicle in a fleet.

Company-specific assessment model. Custom violation criteria for each vehicle or department.

Motivate or penalize. Rank drivers and driver teams based on penalty points and keep in check of those fast and furious.

Extend the fleet service life. Look over head gasket, brake pads, clutch, springs, drive shaft – these car structures will last longer among careful drivers.

VIDEO SURVEILLANCE

KLOUDIP combines GPS tracking and video surveillance in one platform. The solution reduces accident rates, increases fuel economy, and improves road safety.

Track and watch. View videos from your vehicles and production sites on a laptop screen.

Enforce analytics with visuals. Generate reports with event time, location, and video.

Discipline drivers. Watch employees driving and help them become better.
